Product Overview

Telecom-Grade Power Solution

This diesel generator set is engineered specifically for the demanding requirements of telecommunication infrastructure. Designed in strict accordance with current international standards, it provides a reliable power source for both primary and backup applications. The unit features advanced sound-attenuation technology and integrated fuel systems to ensure long-term, uninterrupted service in remote or critical environments.

Performance & Technical

Noise Level

65 dB(A)

Average Noise at 7m

Key Technical Features

- Integrated Automatic Transfer Switch (ATS)
- PMG or AREP excitation system equipped
- Weather-resistant and UV-resistant enclosure coating
- 3-year warranty on enclosure finish

Base Fuel Tank Runtime

72 hours

Compliance & Quality

Compliance

International Standards Compliant, Weather-Resistant, UV-Resistant
