

Telecommunication Antenna

This is a telecommunication antenna. It is designed for signal transmission and reception.

Overview

High-Performance Telecommunication Antenna

This professional-grade telecommunication antenna is engineered for precision and reliability in demanding network environments. Designed with exact dimensional specifications, it ensures optimal structural integration for various mounting configurations. Its robust build quality and standardized measurements make it a versatile choice for infrastructure deployment.

Physical Dimensions

Dimensional Reference Table

Measurement Type	Imperial (in)	Metric (mm)
Height 1	14	356
Height 2	18	460
Height 3	13 1/4	337
Length 1	97 1/2	2476
Length 2	85 5/8	2175

Primary Height	356 mm
Secondary Height	460 mm
Tertiary Height	337 mm
Overall Length (Option A)	2476 mm
Overall Length (Option B)	2175 mm
