

Telecommunications Shielded Cable

High-density multi-pair shielded cable designed for telecommunications and data transmission applications. It features individually shielded twisted pairs to minimize crosstalk and interference.

Product Overview

High-Performance Telecommunications Cabling

This high-density multi-pair shielded cable is engineered specifically for demanding telecommunications and data transmission environments. It features individually shielded twisted pairs to effectively minimize crosstalk and signal interference, ensuring maximum signal integrity. Built with a robust outer jacket, it offers the durability and protection required for reliable long-term operation.

Technical Specifications

Internal Configuration

- SD1
- SD2
- SD3
- SD4
- SD5
- SD6
- SD7
- SD8
- SD9
- SD10
- SD11
- SD12

Pair Count

1200 pairs

Features

Recommended Use

Telecommunications • Data Transmission • High Signal Integrity

Shielding

Individually Shielded, Twisted Pair, Multi-pair
