

Telescopic Boom Aerial Work Platform Truck

This aerial work platform truck features a telescopic boom with a work basket, designed for elevated operations. Its hydraulic systems enable precise positioning and safe operation at height for personnel and tools.

Overview

High-Reach Aerial Solution

This telescopic boom aerial work platform truck is engineered for safe and efficient elevated operations across diverse construction and maintenance environments. Built on a heavy-duty truck chassis, it offers exceptional mobility and stability for rapid deployment. The advanced hydraulic system allows for precise boom extension, retraction, and rotation, ensuring workers can position the platform accurately for tasks ranging from inspection to heavy-duty maintenance.

Technical Specifications

Control Systems

- Boom extension control
- Boom retraction control
- Rotation control
- Platform-mounted safety controls

Platform Capabilities

Telescopic Boom, Hydraulic Operation, Personnel & Tool Capacity, Safety Railings

Chassis Foundation

Heavy-duty truck chassis

Applications

Primary Applications

Construction • Maintenance • Inspection
