

Telescopic Boom Crane for Construction

This heavy-duty crane is designed for agricultural construction and lifting operations. It features a telescopic boom and a multi-reeved hoisting system for handling substantial loads.

Product Overview

Heavy-Duty Telescopic Boom Crane

This heavy-duty elevator crane is specifically engineered for demanding agricultural construction and versatile lifting operations. Featuring an advanced telescopic boom system, it provides extended reach for complex tasks, while the multi-reeved hoisting mechanism ensures secure handling of substantial loads. Built with a robust chassis, this crane offers exceptional stability and maneuverability across various terrains, making it an ideal solution for construction sites, material handling, and large-scale infrastructure projects.

Technical Specifications

Key Design Features

- Telescopic boom for extended reach
- Multi-reeved hoisting system
- Robust chassis for enhanced stability
- Terrain-adaptable maneuverability

Operational Capability

Heavy-Duty • High-Reach • All-Terrain

Primary Applications

Agricultural Construction, Material Handling, Infrastructure Projects, Construction Sites
