

Telescopic Hydraulic Cylinder

Telescopic hydraulic cylinder designed for heavy-duty applications. It features a multi-stage extension for increased stroke length and compact retracted dimensions.

Overview

High-Performance Telescopic Hydraulic Cylinder

This telescopic hydraulic cylinder is engineered for demanding heavy-duty applications, offering a multi-stage extension design that provides significant stroke length while maintaining a compact retracted profile. Built with robust, high-quality materials, it ensures long service life and reliable operation. It is an ideal solution for various industrial and mobile equipment requiring efficient lifting and pushing capabilities.

Technical Specifications

Key Features

- Multi-stage extension design
- Compact retracted dimensions
- Robust material construction
- High-performance durability

Cylinder Type	Telescopic Hydraulic Cylinder
Ideal Applications	Heavy-duty Industrial, Mobile Equipment, Lifting Systems, Pushing Systems

Performance Metrics

Performance Highlights

40 mm

Minimum Stage Diameter

9377 mm

Total Extended Length
