

Telescopic Tree Pruner

This tree pruner features a telescopic handle for extended reach. It is designed for cutting branches and limbs in gardens and landscapes.

Product Overview

Professional Telescopic Tree Pruner

This high-performance tree trimmer is designed for efficient maintenance of trees and shrubs in various landscape environments. It features a robust telescopic tubular handle, allowing users to reach high branches with ease and precision. Constructed from durable, high-carbon steel with precision-ground side teeth, this tool ensures clean cuts and long-lasting reliability for professional-grade gardening tasks.

Technical Details

Material	High carbon steel
Cutting Features	Two side teeth grinding, Nylon rope operation
Handle Construction	Telescopic tubular handle
Rope Length	3 m
Model Identifier	No.57364
