

# Telescopic VHF/UHF Rod Antenna

Indoor rod antenna equipped with two telescopic rods is designed for VHF/UHF signal reception. It features a black base and coaxial cable with a connector for easy connection to a TV or receiver.

## Product Overview

### High-Gain Telescopic Reception

This telescopic VHF/UHF rod antenna is designed to provide reliable signal reception for televisions and receivers. Featuring dual adjustable rods, it allows users to optimize reception quality even in areas with weak signal coverage. The compact base and integrated coaxial cable ensure a straightforward installation for indoor environments.
