

Television Chassis - 198x198mm

This is a television chassis measuring 198x198mm. It incorporates a complex arrangement of electronic components.

Product Overview

Universal Television Chassis Solution

This 198x198mm chassis is designed as a universal replacement or integration board for CRT television displays. It supports a wide range of screen sizes from 14 to 21 inches, offering high versatility for maintenance, repair, and legacy display refurbishment projects. The compact design and integrated Mono audio support ensure reliable performance in standard television configurations.
