

Television Enclosure Mould

This precision-engineered television set mould is designed for the efficient manufacturing of TV enclosures. The mould is crafted with high-quality materials to ensure durability and consistent production.

Product Overview

Professional Television Enclosure Manufacturing

This precision-engineered mould is designed specifically for the efficient mass production of high-quality television enclosures. Crafted with robust materials, it ensures structural integrity and dimensional accuracy across repeated production cycles. By facilitating seamless assembly and consistent output, this mould helps manufacturers reduce overall costs and maintain strict quality standards in television component production.

Technical Specifications

Compatible Model Variants	431, 430, 429, 170, 169, 168, 167, 166
Primary Application	Television set enclosure manufacturing

Production Benefits

Key Production Attributes

- High-durability construction
- Precision-engineered dimensions
- Seamless component assembly support
- Optimized for mass production environments
