

Television Internal Wiring Harness

Internal wiring harness designed for television sets. It facilitates signal and power transmission between different components within the TV.

Product Overview

Professional Television Internal Wiring Harness

This high-quality internal wiring harness is specifically engineered for seamless integration within television chassis architectures. Featuring color-coded wiring for simplified assembly and diagnostic identification, the unit ensures reliable power and signal transmission across critical internal components. The assembly is fully protected by a durable black sleeve, designed to mitigate wear and protect sensitive connections in compact electronic environments.

Technical Specifications

Connectivity

Multi-pin connectors

Wiring Design

Color-coded, Multi-pin terminations, Sheathed

Protection

Protective black sleeve

Primary Application

Television internal circuitry
