

Television Mainboard

This mainboard is designed for use in television sets. It processes video and audio signals, and manages control functions.

Overview

High-Performance Television Mainboard

This versatile television mainboard is engineered for 25-29 inch CRT displays, featuring an advanced Sanyo IC for reliable video and audio processing. The board supports comprehensive global color and sound systems, making it highly adaptable for international markets. With extensive connectivity options and built-in diagnostic protections, it is a robust solution for television repair and manufacturing.
