

Television Replacement Part

This is a replacement component for a television. It features a circular component connected to a rectangular module with wiring and connectors, used in power or signal processing.

Product Overview

Professional Television Replacement Component

This high-quality television replacement part is engineered for reliable power or signal processing applications within compatible display systems. Designed with precision, the module integrates a circular core component with a robust rectangular connector interface. It is an ideal solution for maintenance professionals and technicians looking to restore optimal television performance.

Technical Details

Primary Part Number	43304-00000
Secondary Part Number	107380-00000
Revision/Reference Code	J

Compatibility & Features

Key Attributes

- Integrated circular component
- Rectangular module interface
- Standard wiring connectors
- Power/signal processing architecture
