

Television with Clear Motion Rate Technology

This television incorporates advanced technology for unparalleled motion clarity. Its Clear Motion Rate (CMR) delivers smooth, fluid visuals, enhancing fast-paced action with exceptional detail by integrating screen response time, backlight flashing speed, and image processing capabilities.

Overview

Advanced Motion Clarity Technology

This television features industry-leading Clear Motion Rate (CMR) technology, designed to provide unparalleled motion clarity for professional and immersive viewing. By integrating optimized screen response times, high-speed backlight flashing, and advanced image processing chips, this display delivers exceptionally smooth and fluid visuals. It effectively minimizes motion blur, making it an ideal choice for fast-paced action sequences and dynamic content.

Technical Specifications

Performance Components

- Optimized screen response time
- High-speed backlight flashing
- Advanced image processing chip

Motion Enhancement Technology	Clear Motion Rate (CMR)
