

# Temperature Control Electric Iron

This electric iron is designed for efficient garment care, featuring a temperature control dial for precise heat settings. The non-stick soleplate ensures smooth gliding, while the water tank enables steam ironing.

## Overview

### Efficient Garment Care

This temperature-controlled electric iron is designed for efficient and convenient garment care, suitable for various fabric types. It features a precision temperature control dial and a smooth-gliding soleplate to prevent fabric damage. With versatile steam options and an ergonomic design, it ensures comfortable handling and effective wrinkle removal for professional results.

## Technical Specifications

### Power Rating

**1600 W**  
Max Power

Voltage Options	220-240V, 110-127V
Water Tank Capacity	200 ml
Soleplate Dimensions	205 x 110 mm
Unit Dimensions	26.5 x 11 x 14 cm

## Features

### Ironing Modes

- Dry
- Spray
- Steam
- Vertical Steam

### Steam Control

Variable Steam Control • Powerful Burst of Steam

### Soleplate Material Options

Non-stick, Stainless Steel, Ceramic Coating, Enamel

## Logistics

### Container Loading Capacity
