Product Overview

Comprehensive Health and Access Control

This advanced screening device integrates high-precision temperature sensing with robust face recognition technology to facilitate seamless access control and health monitoring. Designed for efficiency, it features an automated fever alarm to alert staff of elevated temperatures in real-time. The unit also includes a built-in soap dispenser, providing a centralized solution for maintaining hygiene and safety in professional environments.

Features

Primary Capabilities

Face Recognition, Temperature Screening, Fever Alarm, Automatic Soap Dispensing

Applications

Suitable Environments

- Public Spaces
- Office Buildings
- Schools
- Access Control Checkpoints

Security & Monitoring

Safety Features

Yes
