Product Overview

Professional Temporary Fencing System

This temporary fencing system provides a secure and highly visible barrier solution for construction sites, public events, and crowd control. Built from durable galvanized steel, the mesh panels offer exceptional weather resistance and long-term reliability in demanding environments. The system is designed for rapid assembly and disassembly, allowing for easy relocation to meet evolving project needs.

Physical Specifications

Base Weight

25 kg

Weight per Base

Panel Height	2 m
Panel Width	2.4 m
Mesh Size	50mm x 100mm

Technical Details

Available Base Types

- Concrete Feet
- Recycled Plastic Feet

Material Composition	Galvanized Steel, Tubular Frame, Welded Wire Mesh
----------------------	---

Application Suitability

Primary Applications

Construction Sites • Event Perimeters • Crowd Control • Pedestrian Walkways • Restricted Areas
