

Tequila Bottle Display with Internal Illumination

Illuminated tequila bottle displays enhance product visibility in bars and retail environments. The internal lighting creates a striking visual effect, drawing attention to the bottle.

Product Overview

Premium Illuminated Display Solution

This specialized display unit is designed to showcase bottled spirits with high-impact internal illumination. Featuring a distinct glowing effect that mimics electrical discharge, it is engineered to draw immediate attention in high-traffic retail, bar, and restaurant environments. The unit provides a stable, elevated base that enhances visual contrast, ensuring the product stands out against ambient lighting.

Technical Features

Lighting Effect	Internal electrical discharge simulation
