

Textile Circular Sample Cutter

This round sampler, also called a round cutter, quickly and accurately cuts out a 100cm² circular sample from various materials. It is designed for efficient and precise sample preparation.

Product Overview

Precision Circular Textile Sampler

This professional-grade circular sample cutter is designed for the accurate preparation of fabric, paper, and cardboard samples. It features a high-precision 100cm² cutting area, making it ideal for laboratory quality control and textile weight calculation. The device ensures safety and consistency through its rotating protective housing and durable, replaceable blade system.

Technical Specifications

Sampling Area	100 cm ²
Compatible Materials	Wool, Cotton, Chemical fiber, Knitting fabric, Paper, Cardboard

Compliance & Standards

Applicable Standards

- ASTM D3776
- BS 2471
- IWS UNIFIED
- JIS L1018
- JIS L1096

Quality Certifications

CE • ISO 9001:2000 • SGS

Maintenance & Safety

Safety Features

- Locking device for blade retraction
- Protective housing during operation
- Non-slip base with ruled nicks

Blade Configuration	Four equal uniform blades with adjustable replacement platen system
