

# Textile Draw Frame for Yarn Alignment

The textile draw frame is designed to improve yarn quality by aligning fibers and reducing imperfections. Its advanced control system ensures precise drafting and consistent results.

## Overview

### High-Performance Textile Draw Frame

This textile draw frame is a high-performance machine engineered to significantly improve yarn quality through precise fiber alignment. It is designed to reduce imperfections and enhance evenness, ensuring consistent results for various fiber types. With an advanced control system and robust construction, this equipment guarantees reliable operation and optimized yarn production for downstream textile processes.

## Technical Specifications

### Delivery Speed

**3.33 m/s**

Minimum Speed

**10 m/s**

Maximum Speed

Suitable Fiber Length	22-76 mm
Number of Deliveries	2

## Drafting System

### Weighting Type

Pendulum arm spring weighting

Drafting Type	3 over 3 with pressure bar and guide roller
Total Draft Range	4.107-13.59
