

Textile Dyeing Machine

This industrial dyeing machine is designed for efficient and high-quality fabric dyeing. Constructed from durable stainless steel, it features a horizontal cylindrical drum with a control panel for precise operation.

Product Overview

Industrial Textile Dyeing & Washing Solution

The GXF series industrial washing and dyeing machine features a robust horizontal structure designed for high-efficiency textile processing. Constructed with high-quality stainless steel, this semi-automatic system offers versatile heating options including steam or electrical, ensuring adaptability for various laundry and dyeing requirements. It is engineered for low noise, safety, and high efficiency, making it an ideal choice for hotels, commercial laundries, and garment manufacturing facilities.

Key Features

Heating Options

Steam • Electrical

Common Applications

- Hotels
- Restaurants
- Laundry houses
- Water washing plants
- Garment and apparel processing

Certifications

CE, ISO 9001

Technical Specifications

Capacity Range

15 kg

Min Capacity

400 kg

Max Capacity

Model Specifications

Model	Capacity	Drum Dim (mm)	Speed (r/min)	Power (Kw)	Steam Pressure (Mpa)
GXF30	30	660×800	5-33	1.1	0.4-0.6
GXF50	50	800×980	5-33	1.5	0.4-0.6
GXF70	70	950×1220	5-33	2.2	0.4-0.6
GXF100	100	960×1420	5-33	3	0.4-0.6
GXF150	150	1060×1650	5-33	4	0.4-0.6
GXF200	200	1080×2000	5-33	5.5	0.4-0.6
