

Textile Inkjet Printer

This textile inkjet printer is designed for high-resolution outdoor and indoor textile printing, suitable for gifts, wedding photos, and advertising. It features micro-piezoelectricity printing technology with up to 1440dpi resolution and supports water-based, eco-solvent, and heat transfer inks.

Product Overview

High-Performance Textile Printing Solution

This versatile inkjet printer is designed for high-resolution indoor and outdoor applications, including textile printing, wedding photography, gift production, and advertising. Featuring advanced micro-piezoelectric technology and dual printheads, it achieves a resolution of up to 1440dpi for professional-grade output. With a robust mechanical structure and compatibility with water-based, eco-solvent, and heat transfer inks, it offers an efficient and cost-effective solution for diverse printing needs.

Technical Specifications

Printing Technology	Micro-piezoelectricity (drop-on-demand)
Printhead Configuration	2 x DX5 printheads (paratactic structure)
Total Nozzles	2880

Performance Metrics

Printing Speed

50 sq. m./h

Draft Mode

26 sq. m./h

Production Mode

14 sq. m./h

High Quality

Maximum Resolution

1440 dpi

Compatibility & Media

Supported Media

- Adhesive Vinyl
- PVC
- Mesh
- Textile
- Banner
- Eco-solvent inkjet paper

Compatible Inks

Water-based, Eco-solvent, Heat Transfer, Dye Sublimation

Physical Dimensions

Size and Weight Specs

Metric	Printer (m)	Packing (m)
Dimensions (L*W*H)	2.384*0.9*1.25	3*0.93*0.73
Weight	160 KG (Net)	240 KG (Gross)

Power & Environment

Environmental Conditions

20-25 Degrees Celsius • 40-70% Humidity

Operating Power	1000 W
