

Textile Machinery

Textile machinery used in the production of textiles. It offers reliable performance and supports various textile manufacturing processes.

Product Overview

High-Efficiency E-Bike Hub Motor

This high-efficiency brushless DC (BLDC) electric bicycle hub motor is engineered for reliable performance in conversion kits or new manufacturing applications. Featuring a compact design with integrated internal wiring, it ensures a clean and streamlined appearance on the bicycle. The unit includes a robust mechanical brake system and is pre-mounted to a lightweight alloy wheel rim, facilitating ease of installation and long-term durability.

Technical Specifications

Motor Technology	Brushless DC (BLDC)
Braking System	Mechanical Brake

Physical Characteristics

Rim Material	Lightweight Alloy
Design Features	Internal Wiring, Compact Design, Integrated Rim
