

Textile Machinery Band Heater

This band heater is designed for textile machinery applications. It features a circular stainless steel band with an adjustable clamp mechanism and insulated electrical wiring.

Product Overview

High-Efficiency Textile Band Heater

This professional-grade textile machinery band heater is engineered to provide precise and uniform thermal performance for industrial processing. Featuring a robust stainless steel construction, it ensures durability under continuous operation in demanding textile environments. The integrated spring-loaded clamping mechanism allows for rapid installation and maintains optimal contact for efficient heat transfer.

Technical Specifications

Design Features

- Circular band geometry
- Toothed edge design
- Spring-loaded adjustable clamping mechanism
- Insulated electrical wiring

Material	Stainless steel
----------	-----------------

Application

Applicable Industry	Textile Manufacturing, Industrial Processing, Machinery Heating
---------------------	---
