

Textile Machinery Electric Hub Motor

High-torque electric hub motor designed for textile machinery applications. It features a robust construction with an integrated wheel rim for direct installation.

Product Overview

High-Performance Textile Hub Motor

This high-torque electric hub motor is precision-engineered specifically for the demanding requirements of textile machinery. It features a robust construction with an integrated wheel rim, facilitating direct and efficient installation into existing manufacturing systems. Designed for long-term reliability and low maintenance, the motor provides the precise control and smooth operation essential for high-quality textile production.

Technical Specifications

Performance Metrics

1 High

Torque Category

Motor Technology	Brushless Electric Hub Motor
Operating Environment	Industrial, Textile Manufacturing, High-Demand

Design & Construction

Design Features

- Integrated wheel rim for direct mounting
- Robust industrial-grade construction
- Brushless design for extended service life
