

Textile Machinery Electric Motor

Electric motor designed for textile machinery applications. It features a finned aluminum housing for efficient heat dissipation and a stable mounting base.

Product Overview

High-Performance Textile Drive Solution

This electric motor is specifically engineered for the demanding requirements of textile machinery. Featuring a high-efficiency finned aluminum housing, it ensures superior heat dissipation and consistent operational performance. Its robust construction and precision engineering make it a reliable choice for long-term industrial service.

Physical Properties

Housing Material	Aluminum
Cooling Mechanism	Finned convection
Design Features	Finned housing, Robust end cap, Stable mounting base

Application

Target Industry	Textile Manufacturing
