

Textile Machinery Indicator Light

LED indicator lights designed for textile machinery. These lights feature red and amber sections, providing clear signaling for various machine operations.

Product Overview

Industrial Signaling Solution

This textile machinery indicator light is an essential component designed for industrial environments to ensure safe and efficient machinery operation. Featuring a modern U-shape design, the unit integrates high-efficiency LED elements for clear visual signaling. With combined red and amber lighting functions, it serves as a versatile solution for brake, turn, or status signaling requirements.

Technical Features

Lighting Technology	LED
Signal Functions	Brake Light, Turn Signal, Running Light

Design and Compatibility

Integrated Colors	Red • Amber
Physical Shape	U-Shape
Primary Application	Textile Machinery
