

Textile Machinery Rotary Brush Set

Set of three rotary brushes designed for textile machinery. Includes synthetic bristle, brass wire, and segmented plastic brushes for cleaning and finishing.

Product Overview

Professional Rotary Brush Set for Textile Processing

This specialized rotary brush set is engineered for high-performance cleaning, polishing, and finishing tasks within textile manufacturing environments. The set includes three distinct brush types designed to handle various material requirements and mechanical maintenance needs. Engineered for seamless integration, these brushes are compatible with standard textile machinery spindles to ensure reliable operation in demanding production workflows.

Technical Specifications

Included Brush Types

- Red synthetic bristle brush
- Brass wire brush
- Segmented red plastic brush

Primary Applications	Cleaning, Polishing, Finishing
Compatibility	Standard textile machinery spindles
Quantity per Set	3
