

Textile Machinery Solenoid

This jumping solenoid is designed for use in textile machinery. It features a robust construction with a threaded mounting section for secure installation.

Product Overview

High-Performance Jumping Solenoid

This industrial jumping solenoid is precision-engineered for demanding textile manufacturing applications. It is designed to provide rapid and reliable linear actuation, ensuring consistent performance in high-speed machinery. Featuring a robust construction with a secure threaded mounting system, this unit is built to withstand the rigors of continuous operation in textile processing environments.

Technical Specifications

Component Type	Jumping Solenoid
Mounting Type	Threaded Mounting
Application	Textile Machinery, Industrial Automation, Linear Actuation
Interface	Black cable with white connector
