

Textile Manufacturing Machine

This machine is designed for textile manufacturing. It supports various processes within the textile industry.

Product Overview

Professional Braking Component

This high-quality rear wheel brake hub assembly is designed for reliable braking performance. Constructed from durable, lightweight cast metal, this unit features an integrated drum brake mechanism including shoes and lever hardware. It serves as a robust solution for motorcycle maintenance and component replacement.

Technical Specifications

Braking System

Drum Brake

Model ID

WY100

Material Type

Cast Aluminum, Lightweight Metal

Components

Assembly Contents

- Hub assembly
- Brake shoes
- Brake lever
- Associated mounting hardware
