

Textile Manufacturing Machinery

This machinery is used in the manufacturing of textiles. It facilitates various processes required for textile production.

Product Overview

Professional Ignition Utility

This collection of high-utility lighters is designed for reliable performance in various professional and general-purpose settings. Each unit features a standard ignition mechanism protected by a durable metal wind guard. The translucent reservoir design allows for immediate monitoring of fuel levels, ensuring consistent operational readiness for the user.

Technical Specifications

Key Design Elements

- Translucent fuel reservoir
- Metal wind guard protection
- Standard ignition profile

Quantity per Set

5 units

Available Colors

Yellow, Blue, Pink, Purple, Green
