

Textile Manufacturing Machinery

Machinery used in textile manufacturing processes. These machines facilitate the production of various textiles.

Product Overview

High-Efficiency Textile Manufacturing Machinery

This advanced textile manufacturing machinery is engineered for high-performance production cycles in modern industrial settings. Designed with a focus on sustainable operation and precision, it optimizes throughput while maintaining strict quality standards for fabric output. The system integrates seamless automated controls to ensure reliability and consistent manufacturing results for large-scale textile operations.

Operational Metrics

Rated Speed

1200 RPM

Production Speed

Compliance & Standards

Certifications

ISO 9001, CE Certified, RoHS Compliant

Technical Specifications

Power Requirements

Parameter	Value
Voltage	380V
Frequency	50/60Hz
Phase	3-Phase
