

Thermal Cutout Switch

Thermal cutout switches protect against overheating in household appliances. These devices interrupt the electrical circuit when a predetermined temperature is exceeded.

Product Overview

Dual-Sensing Thermal Protection

The 17AM series thermal protector provides comprehensive protection against both overheating and over-current conditions. Its advanced, compact structure allows for sensitive operation and large contact capacity, ensuring a long service life. This switch is essential for maintaining the safety and longevity of various electrical components and horsepower motors.

Technical Specifications

Available Trip Temperatures

- 150
- 180

Sensing Characteristics

Temperature Sensing, Current Sensing

Applications

Recommended Use Cases

Horsepower Motors, Electric Heating Appliances, Fluorescent Ballasts, Transformers, Automotive Motors, Integrated Circuits

Design Features

Key Performance Metrics

18 AWG

Wire Gauge
