

# Thermoelectric Compact Refrigerator

This compact refrigerator uses thermoelectric technology to maintain a constant temperature between 10 and 15 degrees Celsius. It features a transparent cover and an LED display with green light.

## Overview

### Compact Cooling Solution

This thermoelectric compact refrigerator provides a convenient and portable cooling solution for small-scale applications. Designed with a transparent cover and an integrated LED display, it ensures easy monitoring of internal conditions. The unit utilizes advanced thermoelectric technology and is insulated with CFC-free polyurethane foam for efficient, environmentally friendly operation.

## Performance

### Temperature Range

**10 °C**

Minimum Temperature

**15 °C**

Maximum Temperature

## Technical Details

### Environmental Compliance

CFC-Free

### Cooling Technology

Thermoelectric

### Insulation

Full Polyurethane Foam

## Design & Features

### Interface

LED Display with Green Light

### Lid Design

Transparent

## Packaging

### Packaging

Color Gift Box
