

Thermoelectric Portable Air Cooler

This air cooler features a thermoelectric cooling device that cools water before it soaks the honeycomb cooling pad, effectively reducing the cool air temperature. Its compact design includes four wheels for easy movement and space-saving storage.

Product Overview

Advanced Cooling Solution

This thermoelectric portable air cooler utilizes advanced dual-fan technology to deliver enhanced cooling performance for indoor environments. Designed with a sleek, modern, and minimalist aesthetic, it integrates seamlessly into both home and office settings. By leveraging water evaporation, this unit offers an eco-friendly and cost-effective alternative to traditional air conditioning systems.

Performance & Features

Cooling Technology	Water evaporation
Fan Configuration	Dual-fan system
Operating Modes	Normal, Natural, Sleep
Timer Available	Yes

Design & Build

Finish	White
Design Type	Compact and portable
Air Vent Configuration	Dual vertical circular vents

Usage

Application Environment	Home • Office • Indoor
Category	Air conditioners and ventilation equipment
