

Thermomanometer with Black Steel Case and Brass Connection

This thermomanometer features a black steel case and brass connection. It measures both temperature and pressure, displaying the pressure in bar and the temperature in Celsius.

Product Overview

Dual-Function Monitoring

This thermomanometer is a professional-grade instrument designed for the simultaneous monitoring of temperature and pressure in HVAC and hydraulic systems. Housed in a durable black steel case with a brass connection, it ensures reliable performance in demanding environments like boilers and hot water lines. The gauge features a clear, dual-scale display, providing essential operational data for system maintenance and safety.

Technical Specifications

Available Dial Sizes	63mm, 80mm
Accuracy Class	+/- 1.6% full scale

Construction & Materials

Lens Material Options

- Plastic
- Glass

Case Material	Black steel
Bezel	Chrome plated steel
Connection Material	Brass

Installation

Mounting Position	Centre back mount
Connection Size	1/2 inch

Applications

Typical Applications	HVAC, Hot Water Lines, Boilers, Hydraulic Systems
