Product Overview

Complete thermostat assembly kit featuring precision temperature sensing components.

High-Performance Thermostat Assembly

This thermostat assembly with an integrated temperature sensor is engineered for CFMoto 150cc and 250cc engines. It is designed to regulate engine operating temperatures efficiently, preventing overheating and ensuring consistent vehicle performance. This kit includes the necessary thermostat, housing, and sensor to provide an accurate cooling solution for ATV and quad bike maintenance.

Compatibility

Compatible Engine Sizes	150cc, 250cc
Vehicle Types	ATV, Quad Bike

Technical Details

CFMOTO
CF 125/250

High Quality Parts & Kits by Nihao Motor

Included Components

- Thermostat
- Thermostat Housing
- Temperature Sensor
- Mounting Fittings

Important Notice

Compatibility Check

Please verify that this assembly is compatible with your specific vehicle model and year of manufacture. Many vehicles share similar names but utilize different parts depending on production revisions.
