

# Thermostatic Radiator Valve with Liquid Sensor

This thermostatic radiator valve uses a liquid sensor to control temperature. It features a plastic control head for adjusting the flow of hot water to the radiator.

Spec.	1/2"	15mmx1/2"
Code	B00092	B00094
	B00093	B00095

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Temperature Control

This thermostatic radiator valve (TRV) is a self-regulating solution designed for hot water heating systems, enabling precise individual room temperature control. Featuring a liquid sensor and an A-rating energy grade, it optimizes energy efficiency by automatically adjusting water flow based on ambient conditions. All key components, including the sensor, head, and body, are manufactured and calibrated in-house to ensure consistent performance and reliability.

## Key Performance Metrics

### Performance Metrics

**14 Years**  
Years of R&D

**215 Certified**  
EN Standard

## Technical Specifications

Connection Size	R1/2"
Pipe Diameter	15 mm
Total Height	127 mm
Adjustable Length	56mm - 61.5mm

## Design & Materials

Valve Body Material	Brass or metal alloy
Sensor Technology	Liquid Sensor
Control Head	White plastic with numbered settings (1-4)

## Compliance & Quality

### Energy Efficiency

A-rating • EN-215 Certified

### Manufacturing Standards

- Full-automatic production line
- In-house calibration of key elements
- Manufactured according to EN-215

## Product Variants

### Available Model Codes

Product Code	Specification
B00092	1/2"
B00093	1/2"
B00094	15mm x 1/2"
B00095	15mm x 1/2"
