

# Thermostatic Radiator Valve with Liquid Sensor

This thermostatic radiator valve uses a liquid sensor to control temperature. It features a plastic head.

## Product Overview

### Precision Temperature Control

This thermostatic radiator valve is engineered for precise temperature regulation in hydronic heating systems. Featuring a high-quality liquid sensor and a durable chrome finish, it ensures reliable performance and consistent thermal comfort. Built to rigorous standards, this valve is designed to enhance heating efficiency and contribute to energy savings in both residential and commercial environments.

## Technical Specifications

Size	15*1/2"
Material	Hpb57-3
Finishing	Chrome plating
Color	Chrome

## Certifications & Quality

### Energy Efficiency

A-Rating

### Manufacturing Standards

- 14+ years of sensor research
- Full-automatic production line

### Certifications

EN-215
