Product Overview

High-Efficiency Temperature Control

This thermostatic radiator valve is designed for precise temperature control of individual radiators in hot water heating systems. Featuring a high-quality liquid sensor and a durable brass body, it ensures efficient and comfortable heating management. The product is manufactured and calibrated in-house to meet rigorous international standards, providing a reliable solution for professional heating installations.

Performance & Certification

Energy Efficiency

A-rating Energy Grade

Standards Compliance

EN-215 Certified

Technical Specifications

Core Components

- Liquid Sensor
- Thermostatic Head
- Valve Body

Body Material

Brass

Production

Full-automatic production line with in-house calibration

Dimensions & Connection

Unit Dimensions

Feature	Measurement
Total Height	860mm
Head Diameter	48mm
Internal Head Diameter	39mm
Valve Body Width	15mm
Bottom Pipe Diameter	15mm
Side Connection	R1/2

Primary Dimensions

860 mm

Total Height

48 mm

Head Diameter
