

Thermostatic Radiator Valve with Liquid Sensor

This thermostatic radiator valve uses a liquid sensor to control temperature. Its plastic head allows for easy adjustment of the desired room temperature.

Spec.	1/2"	15mmx1/2"
Code	B00092	B00094
	B00093	B00095

Overview

High-Efficiency Temperature Control

This thermostatic radiator valve is engineered for precise room temperature regulation in HVAC&R systems. Featuring an integrated liquid sensor and an A-rated energy efficiency grade, it optimizes hot water flow to radiators for significant energy savings. The robust construction and EN-215 certification ensure reliable performance in both residential and commercial heating environments.

Dimensions & Connection

Total Height	127 mm
Bottom Connection Diameter	15 mm
Side Connection	R1/2"
Horizontal Distance Range	56mm - 61.5mm

Product Variants

Available Model Codes

Model Code	Specification
B00092	1/2"
B00093	1/2"
B00094	15mm x 1/2"
B00095	15mm x 1/2"

Operation

Temperature Settings

- Adjustable range from 1 to 5
- Manual control via thermostatic head
- Precise flow regulation
