Product Overview

Compact Computing Solution

The N130 is a compact, efficient thin client PC station engineered for PC sharing and virtualization environments. By providing access to centralized computing resources, it optimizes hardware utilization and significantly reduces IT management overhead. Its design intentionally excludes USB ports to enhance data security and control, making it an ideal choice for sensitive business and educational applications.

Connectivity & Interfaces

Available Ports

- Speaker Output
- PS/2 Keyboard Port
- PS/2 Mouse Port
- Ethernet Port
- Monitor Output
- DVI
- VGA
- Audio In

Power Requirements

5 V DC

Input Voltage

Controls

Physical On/Off Switch

Security & Features

Security Features

No USB Ports, Centralized Management, Data Transfer Control, Virtualization Ready

Energy Efficient

Yes
