## Product Overview

Product display of the thread port centrifugal pump series

### High-Efficiency Centrifugal Pump

This thread port centrifugal pump is engineered for optimal hydraulic performance, featuring a patented design suitable for both square and round motor configurations. Built with an anti-corrosive pump case and high-quality NSK bearings, it ensures reliability in demanding environments. It is ideal for civil and agricultural applications, including irrigation, water drawing from natural sources, and industrial fluid handling.

## Technical Specifications

### PURITY PACKAGING & TRANSPORTATION

Warehouse storage and preparation for secure international shipment

Motor Efficiency Class	YE3 High Efficiency
Protection Class	IP55 Class F
Port Size	G20 thread
Impeller Materials	Brass, Cast Iron

## Operating Limits

### PURITY PAYMENT & DELIVERY

#### Trade assurance

- 100% Refund of trade assurance amount
- Maintain the time and quality of arrival
- Keep your transaction more safe

Logistics support with trade assurance protection

#### Liquid Temperature

**-10**

Min Temperature

**120**

Max Temperature

Max Ambient Temp	50
Max Working Pressure	16 bar
Service Type	Continuous service S1

## Compliance and Patents

#### Model Series

PC Series
