

Threaded Ball Valve with Barbed Outlet

This ball valve is designed for controlling fluid flow in plumbing and industrial applications. It features a durable metal construction with threaded inlet and barbed outlet for secure connections.

Product Overview

Professional Fluid Control Solution

This threaded ball valve with a barbed outlet is engineered for reliable fluid flow control in diverse plumbing and industrial environments. Featuring a robust metal construction and an intuitive blue handle, it ensures quick operation and long-lasting durability. The design combines a threaded inlet with a secure barbed outlet, making it an ideal choice for water, air, and other compatible media applications.

Technical Specifications

Nominal Diameter	DN15
Nominal Pressure	25 PN
Connection Size	3/4 inch

Design Features

Key Features

- Durable metal construction
- Blue handle for easy operation
- Quick and efficient flow control
- Suitable for water and air

Connection Types	Threaded Inlet, Barbed Outlet
