

Threaded Ball Valve with ISO5211 Mounting Pad

This two-piece ball valve is designed with an ISO5211 direct mounting pad for easy automation. It is suitable for industrial applications requiring reliable shutoff.

Product Overview

Industrial-Grade Automation Ready Valve

This two-piece threaded ball valve is specifically engineered for industrial applications that require reliable fluid shutoff and seamless automation capabilities. Featuring an integrated ISO 5211 direct mounting pad, it allows for quick and precise actuator installation, significantly reducing setup time and system complexity. Its robust construction ensures long-lasting performance and secure connections in demanding operational environments.

Technical Specifications

Standard

USA Standard

Valve Construction	2-Piece Threaded Ball Valve
Mounting Standard	ISO 5211 Direct Mounting Pad
Size	1 1/4 inch
Compatible Media	Water, Oil, Gas
