

Threaded Ball Valve with Lever Handle

This ball valve is designed for on/off control of fluids. It features a robust construction with a brass body and a chrome-plated ball for corrosion resistance.

Product Overview

Versatile Fluid Control

This threaded ball valve is engineered for reliable on/off control of fluids across various systems. Featuring a robust brass body and a chrome-plated ball, it offers excellent corrosion resistance and durability for demanding environments. The manual lever handle ensures quick and easy operation, making it an ideal choice for plumbing, heating, and general industrial applications.

Technical Specifications

Material Composition	Brass Body, Chrome-Plated Ball
Connection Type	Threaded
Operation Mechanism	Lever Handle
