

# Threaded Ball Valve with Red Handle

This ball valve is designed with threaded connections for straightforward installation within piping systems. A red handle facilitates the manual operation of the valve, enabling control of fluid or gas flow.

## Product Overview

### Professional Grade Threaded Ball Valve

This robust threaded ball valve is engineered for reliable flow control in industrial and domestic piping systems. Featuring a durable metal body and a high-visibility red manual handle, it allows for quick and efficient on/off operation. Designed with standard threaded connections, this valve ensures straightforward installation and long-lasting performance for fluid or gas management.

## Technical Specifications

Handle Color

Red

Model Identifier

SV44

Operation

Manual

Connection Type

Threaded

Application Suitability

Industrial, Domestic, Fluid Control, Gas Control
