

Threaded Bicycle Valve with Core and Cap

This bicycle valve features a threaded stem, ensuring secure attachment and compatibility with standard bicycle pumps. The valve includes a core, cap, and assorted washers for complete installation.

Product Overview

American Type Bicycle Valve System

This high-quality threaded bicycle valve provides a reliable solution for tire inflation and maintenance. Designed with a standard American-type profile, it ensures broad compatibility with most bicycle pumps and rim types. The kit arrives complete with the valve core, protective cap, and necessary washers for a secure, airtight installation.
