

Threaded Brass Ball Valve

This brass ball valve is equipped with threaded connections on both ends and a quarter-turn handle for on/off control. It is suitable for fluid control applications in plumbing and industrial settings.

Product Overview

Professional Fluid Control

This threaded brass ball valve is engineered for reliable fluid control in both plumbing and industrial environments. Featuring a robust brass construction, it offers excellent corrosion resistance and long-lasting durability for demanding applications. The intuitive quarter-turn handle design ensures quick and easy operation, making it an ideal solution for efficient flow management.

Technical Specifications

Material	Brass
Connection Type	Threaded
Operation	Quarter-turn handle

Key Features

Key Features	Corrosion Resistant, Durable Construction, Easy Installation, Reliable Operation
--------------	--

Applications

Suitable Applications

- Plumbing systems
- Industrial fluid control
- General flow management
