

Threaded Metal Fitting with Ports

This chrome-plated metal fitting features three threaded ports for connecting pipes or hoses. A hexagonal nut allows for tightening, and a small cylindrical port is included for a pressure gauge or additional connection.

Product Overview

Industrial Threaded Metal Fitting

This high-quality chrome-plated metal fitting is engineered for reliable connectivity in fluid or gas distribution systems. Featuring a multi-port design with a central hexagonal nut, it allows for secure tightening and precise integration into complex piping networks. An additional top-mounted cylindrical port is included, providing an ideal connection point for pressure gauges or secondary instrumentation.
